SEMASS Partnership
P.O. Box 190
Rochester, MA 02770

To whom it may concern,

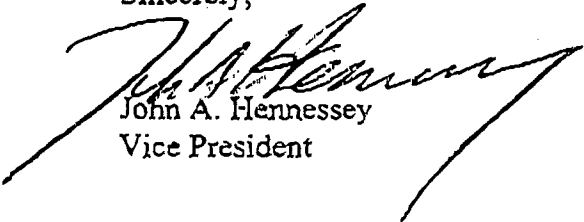

SEMASS Partnership has positively impacted the economic environment of local businesses. The Rochester area has a very high unemployment rate. SEMASS employs a large number of Rochester area residents improving the unemployment rate. The job opportunities provided by SEMASS have helped improve the economic environment of local business by increasing the spending power of local residents.

Also, SEMASS has helped improve our company's prosperity enabling us to broaden our scope of business within the Rochester area. The strength of our operations at SEMASS has allowed us to market our services to other businesses in the local area. This in turn has allowed us to expand our operations in the local area.

SEMASS Partnership also provides a positive environmental impact in the area. The process of converting waste into energy has created an alternative source of energy to the Rochester area. This has helped area residents conserve diminishing sources of energy as well as provide a recycling benefit.

As you can see, SEMASS has provided positive economic and environmental impact to local area businesses. Please feel free to contact me if you would like to discuss this in more detail.

Sincerely,

John A. Hennessey
Vice President
