EAC

John C. Lemery, President  
ENERGY ANSWERS CORPORATION  
48 Howard Street  
Albany, NY 12207

Dear Mr. Lemery:

I have been following the development of the SEMASS waste-to-energy facility to be built in Rochester, Mass. since its inception.

Within my District there is a definite need for a solution to the problem of solid waste disposal. Whereas SEMASS is a regional facility, it will benefit a number of communities in my District, addressing the environmental concerns related to landfilling, providing immediate and long-term employment opportunities and establishing a major industry in Southeastern Massachusetts.

Due to these and other benefits, I wish you success in completing the SEMASS project. If I can be of assistance in your efforts, please contact my office.

With every best wish, I remain

Sincerely,

William Q. MacLean, Jr.  
STATE SENATOR
